DIVISION OF SCIENCE RESOURCES STUDIES

The Division of Science Resources Studies (SRS) fulfills the legislative mandate of the National Science Foundation Act to ...

provide a central clearinghouse for the collection, interpretation, and analysis of data on scientific and engineering resources and to provide a source of information for policy formulation by other agencies of the Federal Government...

To carry out this mandate, SRS designs, supports, and directs periodic surveys as well as a variety of other data collections and research projects. These surveys yield the materials for SRS staff to compile, analyze, and disseminate quantitative information about domestic and international resources devoted to science, engineering, and technology.

If you have any comments or suggestions about this or any other SRS product or report, we would like to hear from you. Please direct your comments to:

ACKNOWLEDGMENT

The preparation of this report was managed by Alan Rapoport, Senior Analyst, Division of Science Resources Studies (SRS), National Science Foundation. The report was prepared under contract by Gottlieb Associates, Inc. for SRI International. Jeanne Griffith, Division Director provided overall guidance and review. The text was reviewed by contributors to the workshop and by Joan Burrelli and Alan Rapoport of SRS. Anne Houghton, Julia Harriston, and Tanya Gore of the Pub-

lications Management Group of SRS provided copyediting, processing, and final composition for this report.

SRS also would like to thank the many workshop participants and the workshop planning group without whom this initiative could not have been successfully undertaken.
